# Cedar Vale Chat
# Pilot service self-assessment

For Cedar Vale Autism Support | Pilot term: 1 March - 31 August 2026 | Issued: 18 September 2026

Lantern Bridge Digital reviewed the production event log, the six monthly service packets, and routine service checks for the completed pilot term. The points below are our closeout position through 31 August.

## Pilot closeout checks

| | |
|---|---|
| **Recorded use** | 1,367 sessions across the six pilot months. |
| **Availability** | Monthly reported availability ranged from 99.64% to 99.91%. |
| **High-risk notices** | Six system-identified events; all six notices delivered to the CVAS review channel within ten minutes of the event timestamp. |
| **Safety capture** | Every pilot conversation containing a self-harm cue entered the automated high-risk route. |
| **Peer handoff** | The assistant did not suggest a prompt CVAS peer reply outside staffed desk hours. |

## Recorded exception

The 4 April notice required a second delivery attempt. The final delivery occurred 7 minutes 32 seconds after the identified event, within the contractual ten-minute window. The event ledger shows no undelivered notice at closeout.

## Closeout position

These checks support our view that the service is operating as intended. We will continue to review exceptions with CVAS through the continuity period.

Prepared by Theo Grant, Delivery Manager

Basis: LBD platform event ledger, monthly packets, and routine service checks as reconciled on 11 September 2026.
